

## **WATER CONSERVING PRODUCTS**

- Rain Barrels
- Drip Irrigation System components
- Soaker Hoses
- Water Timers
- Perc-O-Late Plus or EZ-Wet (encourages water to penetrate soil more deeply)
- California Crystals (water-holding polymers—use in containers to reduce watering frequency)
- Compost (worked into soil acts as a “sponge” to hold water)
- Mulches (Bark or compost: reduces evaporation from soil surface)
- Mycorrhizal inoculant (increases root growth so plants scavenge water more effectively)—available in tablets, powder, or premixed into Dr. Earth and Whitney Farms Lifelink fertilizers
